PROFESSIONAL SUMMARY

Full stack Software Engineer with 13 months of hands-on experience (7 months as an intern and 6 months as an Associate Software Engineer), specializing in Java and Spring Boot. Experienced in building and supporting production Point of Sale systems, including payment terminal integration, kiosk interfaces, store deployments and bug fixing, along with REST API development using Django REST Framework and React frontends. Strong communicator who works directly with clients and stakeholders, seeking a Software Engineer role to grow in a challenging, product-focused team.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C++, SQL, C#/.NET (backend exposure)

Backend: Spring Boot, Spring Security (JWT), Spring AI, Hibernate/JPA, Django REST Framework, REST APIs

Frontend: React, HTML, CSS, JavaScript, Java Swing

Databases: MySQL

Tools & Practices: Git & GitHub, Flyway, Grafana/Loki (log monitoring), MCP, Agent2Agent (A2A)

Soft Skills: Client Communication, Problem Solving, Team Collaboration, Production Support, Adaptability

PROFESSIONAL EXPERIENCE

Associate Software Engineer (Full Stack, Java) 6 Months
WalQalum Technologies

- Developed and maintained features for PlatformPOS, a Java-based Point of Sale system used across multiple client store environments.
- Implemented PAX payment terminal integration covering credit/debit handling, part payments and cash discount programs, and resolved related payment bugs.
- Designed and built kiosk user interfaces and worked on Conexxus Food Service kiosk integration.
- Configured and deployed store-specific POS setups and fixed production bugs to keep client stores running smoothly.
- Tested the TruAge age-verification feature within the POS workflow.
- Set up Grafana/Loki log collection and monitoring for POS environments to speed up issue diagnosis.
- Handled client-facing technical communication and coordinated with leads and stakeholders on requirements and fixes.

Software Engineering Intern (Full Stack) 5 Months
WalQalum Technologies

- Worked across frontend and backend development tasks under senior engineer guidance, building a strong base in Java and full stack practices.
- Contributed to feature development and bug fixing and followed team Git workflows.

Intern 2 Months
SmartSEO

- Completed an internship and gained early professional exposure to working in a software team.

PROJECTS

Production Projects

- **Unicenta OPOS (Core Java UI on Java 8, .NET backend):** Worked on this Point of Sale system in production, building and fixing features across the Java UI and .NET backend, and communicated directly with clients on requirements, issues and fixes.
- **GLUU (Spring Framework):** Worked on this Spring Framework application in production, delivering features and bug fixes, and handled client communication.

Other Projects

- **Sales Data Pipeline (Spring Boot / Spring Framework):** ETL pipeline for processing sales data with Java and MySQL.
- **Simple POS (Core Java):** Point of Sale application built with Core Java and MySQL.
- **Chatbot with MCP (Spring AI):** AI chatbot using Spring AI and Model Context Protocol.

- **Agent2Agent Communication (Spring Boot):** Agent-to-agent communication implementation.
- **Travel Agency Platform (React + Django REST):** Full stack travel agency application.
- **Chat Application (React + Django REST):** Full stack chat application.
- **E-Commerce Frontend (React):** Responsive e-commerce storefront UI.
- **Todo List Apps (JavaScript + DRF, React + DRF):** CRUD apps integrating frontends with Django REST APIs.

EDUCATION

BSc Software Engineering CGPA: 3.01
University of Engineering & Technology (UET)

FSc Pre-Engineering 1008 / 1100
Govt. Islamia Civil Lines College

Matriculation (Computer Science) 1022 / 1100
Bright Way Foundation School

LANGUAGES

English, Urdu, Punjabi
